Guest Editorial

The Early Editors

During its half-century existence, *College & Research Libraries* has been directed by nine editors. They, and their respective terms of office, have been as follows:

- A. Frederick Kuhlman 1939–1941
- Carl M. White 1941–1948
- Maurice F. Tauber 1948–1962
- Richard B. Harwell 1962–1963
- David Kaser 1963–1969
- C. James Schmidt 1980–1984
- Charles Martell 1984–date

All of them were the kind of exciting, tough-minded people who make things happen. All of them were scholars, with seven of them holding Ph.D. degrees, and among them they directed during their careers ten ARL libraries and half a dozen of the nation’s good college libraries.

It has been my pleasant fortune to have known all of these men quite well, and I could speak highly of each of them. Since all of my predecessors in the editorship have died within the present decade, however, I will use this opportunity instead to post a few brief comments about only those first four and their unique contributions to this assignment.

Frederick Kuhlman, an early doctorate in sociology from Chicago, was easily the most memorable of them all. A resourceful man of iron self-discipline and indomitable will, yet with the heart of a pussycat, he manhandled the incipient research library community of the late Depression years into accord with his own clear vision of its potential. In the face of remarkable unenthusiasm from most of the profession, he established this journal almost single-handedly because in his unique prescience he knew that it would be needed. After nourishing it successfully through its suckling years he passed it on, a lively and viable man-child, to his successor thirty months later. Frederick died in 1986 at age 97, perhaps the last surviving Fellow of the once honorific but now defunct American Library Institute.

Carl White was trained at the doctoral level in philosophy at Cornell and was an ideal personality to take over *C&RL* from Frederick. Urbane, patient, and unflappable, yet a rigorous, demanding scholar/administrator withal, his lower-key approach was able to gain the journal much wider-spread reception of its essential utility to academic librarianship than Frederick’s had been able to elicit. Under Carl’s steady hand, it gained in strength and support, and by the time he gave it over to Maury Tauber seven years later it had become firmly rooted into the psyche of ACRL. Following his varied and illustrious career, Carl died in 1983 at age 80.

Maury stayed on in the headship of *C&RL* longer than any other editor, and it was clear throughout the period that he played decisions close to his vest. To Maury an editorship was the last bastion of absolute autocracy left on the face of the earth, yet he did his work...
well, and few complaints were voiced. He had a keen sense of scholarship derived from his doctoral training in the GLS at Chicago, and for fourteen years he sought with some success to enhance the research content of the journal. His long tenure assured a uniform high level of editorial quality to its offerings, and when he forsook the journal in 1962, few academic librarians were able to recall an earlier incumbent. Maury died in 1980 at age 72.

Rick Harwell was not cut from the same fabric as his predecessors, but he would have been able to move the journal forward nonetheless. As the product of a different educational tradition with a strong bibliophilic cast, he sought to broaden the interest level of its contents and to improve its literary quality. He took over the journal, however, concurrent with his appointment as librarian of Bowdoin College, and he soon found himself unable to fulfill the time demands of two new jobs at the same time. He left the journal little changed after producing only five issues and died in 1988 at the age of 73.

With Rick’s resignation, then, the first twenty-three of C&RL’s fifty years came to a close. The journal was still performing the same tripartite function for college and university librarians envisioned by its founder, but doing it better: namely, carrying the news of the association and publishing the applied scholarship, as well as contributions to the forum, of academic librarianship. It had played an inestimable role in the evolution of the profession, as Frederick Kuhlman had somehow known it would. By the time of Rick’s departure it was almost as difficult as it is today to visualize our professional selves without being able to read and refer to College & Research Libraries.

DAVID KASER

Our triumphant technologies of recording and maintenance have forced upon us the need for a wiser philosophy of use.

—Alexander Laing, April 1949

We’ve Put Our Reputation Online!

You know us as the producer of Biological Abstracts*. For over 60 years we’ve been providing coverage of the latest research findings in the life sciences.

We also produce BIOSIS Previews*, the online database offering you the largest collection of biological and biomedical references available. This database monitors over 9,000 serial sources from more than 100 countries for news of important life science research findings, noteworthy clinical studies, or discoveries of new organisms. We’ll process over 500,000 new items this year. Over 6.5 million citations will be included in the BIOSIS Previews database by the end of 1989.

Whether you’re looking for current life research findings, or the historical background of a particular topic, BIOSIS Previews can provide you with references to a massive and diverse body of scientific literature. It’s the life science research database that will answer your questions.

For more information or to find out how to access BIOSIS Previews, contact BIOSIS, Marketing Section, 2100 Arch Street, Dept. CRL389RO, Philadelphia, PA 19103-1399 USA. Telephone (215) 587-4800 worldwide; toll free 1-800-523-4806 (USA except PA); Telex 831739; Fax (215) 587-2016.

Biological Abstracts and BIOSIS Previews are registered trademarks of BIOSIS. BIOSIS is a registered trademark of Biological Abstracts Inc.
Technological, scientific, and artistic innovations that influenced the world are now available one collection, The Books of the Fairs, from Research Publications. Inquired of nearly 2,200 books and pamphlets from the Smithsonian Institution Libraries, The Books of the Fairs will be the largest 35mm micropublication of world fair exhibition publications available.

ded for easy access
A printed guide with a scholarly introduction by Robert W. Rydell, Ph. D., a checklist of titles with citations of the microfilm will be provided. RC cataloguing will be available on OCLC.

Special prepublication pricing is available.

Please send me information on other RP products and services checked:

- Research Collections in Microform
- Television News Transcripts and Indexes
- International Newspapers on Microfilm
- Newspaper Indexes
- Journals in Microform
- U.S. and International Patent Documentation

From the 1834 Exposition des produits de l'industrie française to the 1915-16 Panama-California International Exposition, The Books of the Fairs is a rich and diverse resource for industrial and artistic displays that promoted trade and reflected cultural progress worldwide.

For research and comparative studies of national and international relations, science, engineering, sociology, architecture, museums, consumer tastes, racism, gender conflicts, and much more, this is the one collection for your library.

To place your order, call toll-free 1-800-BEACh-RP (1-800-738-8477). In Alaska, Connecticut, and Canada, call collect: (803) 397-2800. To receive more information use the form below or call now.

I have the best job in the serials subscription business...

because it offers so many opportunities for service to my colleagues in academic libraries.

"I spent 16 years in an academic library where I experienced firsthand the complexities of serials management, the challenges of collection development and the great demands placed on academic librarians. At EBSCO I've found a significant way to put that experience to work for our customers. "I'm an Account Services Manager, a position that's unique to EBSCO in the serials subscription business. It's my job to see that you get all the help you need from EBSCO to manage your serials responsibilities effectively. So I listen... I advise... and I solve problems.

"Like my counterparts in EBSCO Regional Offices across the country, I work with the other members of your serials support group—the EBSCO Sales Representative, General Manager and Customer Service Representative—to ensure that the routine aspects of your subscription program are handled promptly and efficiently. But I'm also available to help with the more sophisticated, non-routine needs you might have—like customized budget analysis reports, collection development reports, training seminars, reviews of services provided and of others available through EBSCO... whatever your special needs may be."

Lee Ketcham, MLS
Account Services Manager

At EBSCO, we think academic librarians deserve qualified personnel who know and understand the challenges they face. Isn't that what you expect from a professional subscription agency?
