"Established to aid the study of the origin and development of the book." W.E.W.

Physical Educator; Official Publication of Phi Epsilon Kappa Fraternity. (Affiliated with the American Association for Health, Physical Education, and Recreation.) 1537 W. 29th St., Indianapolis. Vol. 1, No. 1, Oct. 1940. Five times a year. $1.50 a year.

Public Administration Review; Journal of the American Society for Public Administration. 1313 E. 60th St., Chicago. Vol. 1, No. 1, Autumn 1940. Quarterly. $5 a year.

"To advance the science, processes, and art of public administration." Reviews of books and documents.

A book selection guide which will index more than 6000 professional reviews every year, including reviews of foreign books.

Studies in the Control of Radio. Published by the Radiobroadcasting Research Project at the Littauer Center of Harvard University, [Cambridge, Mass.] No. 1, Nov. 1940. Irregular. 50¢ a copy. W.E.W.

Studium; Órgano de los Estudiantes Universitarios de Guatemala. Pasaje Aycinena 21, Guatemala City. Vol. 1, No. 1, Jan. 1941. Quarterly. $2 a year. Reports of research and theses by faculty and students in the schools of medicine; odontology; natural and pharmacal sciences; economics; engineering. D.H.L.

Guide to the literature on international affairs arranged by subject, with author, subject, and source index.

Recent Literature on Higher Education

The following annotated list has been compiled by Clara Esther Derring and Carrie E. Meares of Teachers College Library, Columbia University.

"The author, a member of the faculty of New York University, assigned by the American Council on Education to the difficult task of coordinating educational values and national defense needs, here writes of the situation today as seen from the vantage point of the nation's capital."

"A sketch of the curricular situation in American higher education today and a consideration of the curriculum in relation to the catalog are given. "There is general agreement in regard to what is appropriately included in a college catalog, but specific questions nevertheless arise for which score cards and other aids do not afford the answers. In respect to these numerous questions that must be decided in terms of the particular catalog of the institution, it is believed, affords the basis for decision. Any element has a claim for consideration for place in the catalog to the extent that it is related to the educational program. Items such as calendar, campus map, the governing board, the administrative and instructional staffs are obviously related to the course offerings."

A comprehensive summary of researches published in this area during the past year.

The general topic "Liberal Education and Democracy" was the concern of the twenty-seventh annual meeting of the Association of American Colleges in Pasadena, January, 1941. The papers and general discussion revolved around the report which is being prepared for the American Council of Learned Societies by Prof. Theodore M. Greene of Princeton University.

Problems of population, public and private support, accrediting agencies, and the significance of individual differences are discussed.

"If teaching, learning, and research are the central processes of a college or university, then it is obviously much to be desired that the main administrative officers should understand the essential character, the purposes, and the problems of teaching, learning, and research. This means, in practical terms, that professors—though it is undoubtedly for the good of the professor that there should be some few who..."

Byrne, Charles D. Coordinated Control of Higher Education in Oregon. Stanford University Press [c1940]. 150p. $2.75.

A study of the operation and functioning of Oregon's State System of Higher Education.

The author describes "six different patterns of the curriculum which seem to be emerging from current attempts to reorganize the liberal arts curriculum." Bibliography, p. 143-54.

This study is the seventh of a series on the various aspects of the relation of the state to higher education. "It concerns the fiscal control vested in the state executive officers or agencies over state universities and colleges. Practically all the states have recently taken steps toward the increased centralization of fiscal control over the various units comprising the state governmental organization in such officers or agencies. Inasmuch as the governing boards of these institutions were originally endowed with considerable autonomy over their financial affairs the transfer of this control to central state officials has presented problems of far-reaching consequence to their development.

PERIODICAL EXCHANGE UNION

The Board of Directors of the Association of College and Reference Libraries have voted unanimously to endorse a plan for a duplicate periodical exchange union which is outlined below. This plan was published in the February 15, 1940, issue of the Library Journal. Since that time seventeen libraries have agreed to try out these suggestions, and five other libraries have indicated substantial interest in the plan, if it could be put into operation. It is hoped that the plan may be initiated by July 1, 1941, and that before that time many other libraries will indicate that they are willing to give it a trial.

The essential points of the plan for a periodical exchange union as approved by the Association of College and Reference Libraries are as follows:

1. Member libraries will agree to the free exchange policy, thus eliminating much record keeping and circumventing money difficulties.

2. Each library will list its duplicates, giving volume, number, and date.

3. These lists will be circulated among the participating libraries in the order of the size of their annual budget for periodicals. Libraries putting most money into periodicals will have priority over the others. Presumably most of the material large libraries will need will be more rare and difficult to obtain than that desired by smaller libraries. The advantage to smaller libraries of access to duplicate material of large libraries offsets this priority of choice.

4. As these lists pass from one library to another, items required by any library will be crossed off the list by that library, and requested from the library owning them. The receiving library will pay carriage charges. Libraries will be asked to keep a record of the number of pieces of bound and unbound material sent to and received from members of the exchange union.

5. Libraries desiring to become members of the exchange union are urged to send their lists of periodical budget figures to Fisk University Library, Nashville, Tenn., Neil C. Van Deusen, librarian, as long as possible before July 1. A routing list will then be prepared by the Fisk University Library staff, and will be submitted to the American Library Association statistical staff, as a neutral agency, for checking against their records of periodical budgets. Fisk University Library will undertake to mimeograph the routing sheets and to mail them to all participating libraries. Each library will then forward its list of periodical duplicates to the first library on the list, and the plan will be in operation.

NEIL C. VAN DEUSEN, Librarian
Fisk University

Recent Literature on Higher Education

(Continued from page 279)

"This bulletin contains an analysis of the policies and practices adopted by the individual state with respect to this subject." Foreword.

A critical synthesis and interpretation of research in the field of education. The articles are signed. Selected bibliographies.

The following phases of the subject are included: (1) The obligation of the institution to its students; (2) Administrative organization for student personnel services; (3) Institutional provisions for understanding students; (4) Interpretation and use of data in counselling students; and (5) Evaluation of student personnel services.
